

Your smart choice
for smart pole infrastructure

WirelessPSC

www.wirelesspsc.com

WirelessPSC is a developer and manufacturer of smart telecom poles & related infrastructure

Our Role

We provide off-the-shelf small cell poles to turf vendors or directly to real estate developers and others creating private networks in the continental United States. Our core competency is scoping, designing and delivering built-to-suit poles and related infrastructure. With our long track record in RF and related services we can also play a technical intermediary role on behalf of municipalities with other stakeholders in the wireless ecosystem.

Our Products

Product	Height (ft.)	Width	Diameter (OD) (in.)	Smooth	Fluted	Options
Extension or Main Pole	10 to 40	-	6.6, 8.6, 9.6 & 10.7	X	X	Custom Color
Integrated Cylinder Base	3 to 10	-	14 & 20	X	NA	Custom Color
Mid-pole Concealment Enclosure	BTS	BTS	NA	NA	NA	Custom Color
Sidearm Mount	BTS	BTS	NA	NA	NA	Custom Color
Pole-top Concealment	BTS	BTS	NA	NA	NA	Custom Color

Our Built-to-suit Development Process

Our Value Add

WirelessPSC has a long track record of serving the needs of the wireless ecosystem. We've designed, manufactured and installed advanced small-cell antennas for 4G and 5G systems. Our team understands RF and civil engineering – as well as shrouding, concealment and aesthetics – and has extensive ecosystem relationships based on 20+ years working in the industry.

Focused on what we do best:
built-to-suit small cell infrastructure delivered on time

WirelessPSC is a developer, manufacturer and distributor of small-cell poles and related infrastructure in support of 4G, 5G and “smart” network densification across North America. Our long history in RF engineering and related services, in conjunction with our specialized composite manufacturing partners, enables us to deliver differentiated and built-to-suit smart pole infrastructure. Headquartered in Frisco, Texas, WirelessPSC is a minority business enterprise (MBE) that supports operators and their construction partners, as well as municipalities, in the deployment of wireless small cells.
